Budget Update

In September, 2012, the Department submitted its Fiscal Year 2013 -2014 budget request for approximately \$12.5 million in additional recurring State funds, and approximately \$60 million in one-time funds for capital improvements and other needs. The specifics of the Department's request are listed below.

- Sustainability of Mental Health Services - \$9,416,420
- SCDMH must replace non-recurring funds from Medicaid cost settlements – which will be ending – with State recurring appropriations by FY 2015.
- Sexually Violent Predator Treatment Program - \$1,406,533
- The census of the program is steadily increasing, and the additional amount requested represents the increased personnel and operating costs anticipated to treat the expanding population
- Forensic Inpatient Services -- \$1,200,000
- Due to increased numbers of commitments, the agency has had difficulty timely admitting individuals committed by the criminal courts, resulting in a growing waiting list. The agency plans to use a currently vacant building to create additional residential capacity for forensic patients who no longer require hospital level care, but who continue to require a structured, supervised, assisted-living program.
- Telepsychiatry Program Sustainability - \$500,000
- Because of its success and its promise as a model of cost-effectiveness and efficiency in the future delivery of healthcare, SCDMH has received continuing grant funding for the program from The Duke Endowment. However, it has been understood that eventually grant funding for the program will end. The additional requested State funds are necessary to ensure the financial viability of the program following the expected reduction or elimination of further grant funding.
